JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

to them, is a little uncouth and odd, but intelligible enough, especially the Mans. They were not Twins; and I knew three Brothers of the same Parents, that had their Hearing as well as any Persons whatever.

---

**VI. A Relation of a Deaf and Dumb Person, who recover'd his Speech and Hearing after a Violent Fever: With some other Medicinal and Chirurgical Observations. By Mr. Martin Martin.**

**D**aniel Fraser, a Native of Strabarig, some six Miles from Inverness, continued Deaf and Dumb from his Birth, till the seventeenth Year of his Age. The Countess of Crawford kept him in her Family for the space of eight or nine Years: After seventeen Years he was taken ill of a violent Fever, but being let Blood his Fever abated, and had not its Natural Course: About five or six Months after, he contracted a Fever again, and had no Blood drawn from him, and this went on with its Natural Course. Some Weeks after his recovery he perceived a motion in his Brain, which was very uneasie to him, and afterwards he began to Hear, and in process of time to understand Speech; this naturally dispos'd him to imitate others, and attempt to Speak: The Servants were much amaz'd to hear him, and some run away; he was not understood distinctly for the space of some Weeks; he is understood now tolerably well, tho' he yet retains the *Highland Accent*, as *Highlanders* do who are advanc'd to his Years before they learn the *English Tongue*: he can speak no *Irish*, for it was in the *Low Lands* of *Scotland* that he first heard and spoke. He continues

to serve the Earl of *Crawford*. I left him at *Morpeth* the beginning of this Month of *August*, 1707.

When the Small-Pox is Epidemical in the Main Land over against *Skie-Isle* on the S. E. and East, and likewise in *Skie-Isle*, the Natives Bathe their Children in the Infusion of *Juniper* Wood, and they generally escape; whereas those who neglect this Precaution, are observed often to die: Of this I have seen several Instances.

The Plant *Water-lilly* being apply'd to the pain'd part of the Body where a *Felon* is fix'd, it is observed, that it forces its Passage quickly in that place through the Skin.

The red hot Iron is commonly used in piercing an Inch deep in Arms or Legs, and cures several Distempers.

A Wound or Scarification cross the Crown of the Head cures Fluxes and Dysenteries. The Blood being stanched, the Wound is cured as other Wounds commonly are.

*Silverweed* is used as *Hops* to brew Beer.
